Procedure: 1. First remove the top zipper. To do this, you can use the pliers tool. 2. Remove the old slider. 3. Use the new slider. 4. Then use the pliers tool to press the zipper stop back into place.

Wide application: repair coats, hoodies, jackets, sweatshirts, jeans, pants, shorts, wallets, bags with broken zippers, easy-to-replace parts, enough backups for future use, you don't have to throw away any clothes and bags.

Mini Installation Pliers: with pliers for installing zippers. Easy to install and remove. Very practical for everyday use. Suitable for DIY and zipper repair projects.

Procedure: 1. First remove the top zipper. To do this, you can use the pliers tool. 2. Remove the old slider. 3. Use the new slider. 4. Then use the pliers tool to press the zipper stop back into place.

Wide application: repair coats, hoodies, jackets, sweatshirts, jeans, pants, shorts, wallets, bags with broken zippers, easy-to-replace parts, enough backups for future use, you don't have to throw away any clothes and bags.

The package contains: a total of 169 spare pieces with zipper, 15 x silver slides (#3, #5, #8), 15 x black slide (#3, #5, #8), 6 x double black slide (#3, #5), 6 x silver double slide (#3, #5), 30 x bottom plug (#5, #8), 60 x top plug (#3, #5, #8), 4 x Antique Brass Metal Zipper with Castle (#5), 6 Pieces

Long Life Quality: Made of high-strength metal, not easy to fade. Good workmanship makes it smooth and durable. Therefore, they are very durable and can last for a long time. The surface is smooth and perfect, which makes it smoother when you wear it, and it doesn't get clothes stuck.

HOW DO I CHOOSE THE RIGHT SLIDER FOR MY ZIPPER ?

Here are 2 solutions to find the right slider reference for your zipper.

1. Finding the right cursor with the Zlideon size guide

Print the guide with the most common cursor sizes, compare the drawings with the teeth of your zipper and find out which cursor would be needed for your zipper.

Download and print the Zlideon size guide

All Zlideon references in one small guide.

Compare the type of teeth to your zipper.

Easily find the width of the teeth and choose your Zlideon cursor.

2. Find your cursor by measuring the teeth of the zipper

To begin with, indicate your type of zipper, you have 4 possibilities:

metal zipper = A

plastic zipper = B

nylon zipper = C

invisible zipper = C2

The following images show you the teeth of each zipper category:

Letter A cursors are for metal teeth.

The letter B ones are for zippers with plastic teeth.

Letter C cursors can only be used for nylon.

And the C2 ones are only for invisible zippers. To choose the cursor you need for your zipper you must first find your type of teeth: A,B,C, C2.

Most zippers have an engraved number behind the slider indicating the size (it can be 3, 5, 7, 8 or 10). If there is no number behind your cursor, you can measure the width of the zipper, when it is closed.

Zipper TypeWidth in mmSize

Metal
4,55-4,90
Size 3

HOW TO CHANGE THE CURSOR OF A ZIPPER

In this post you will learn how to change the cursor of a zipper in a very simple way.

Having to fix a zipper is one of the most common things in sewing, and it is also very practical.

By learning to do so, you can give a second chance to many of your garments, those of your loved ones, or customers.

HOW TO CHANGE THE CURSOR TO A ZIPPER

It's very simple, just follow these five steps:

1. First, unsew the waistband of the pants, only in the area where the zipper is attached.

2. When you've done that, take out the ends of the zipper that were hidden in the waistband, remove the metal stopper from the top.

Take out the broken cursor, trying to keep the zipper closed when you do so so that it will be easier for you to place the new cursor.

3. Now place the new cursor.

The new cursor can be recycled from any other pair of trousers that you plan to dispose of or buy at your haberdashery.

Cursors are normally classified by the size of the zipper mesh, i.e. the width of the teeth (mesh 3 or mesh 5).

4. Once you've inserted the new cursor. Sometimes it resists a bit, so be patient.

Tuck the end of the zipper back into the inside of the waistband to hide it, and thread a straight stitch, with your sewing machine, glued to the edge to close it.

5. To finish, make several cross stitches by hand, right at the point where you have removed the metal stopper.

Those stitches will again make a stop for the zipper cursor at your top.

And you've already changed your zipper cursor.

If nothing unforeseen arises, it will not take more than 15 minutes.

Product Description

Description:

1. Made of high-strength metal, excellent galvanic, not easy to fade. Good workmanship makes it smooth and durable.
2. It offers frequently used replacement slides in many sizes to repair bags, clothing, coats, outdoor tents, jackets, wallets, jeans, backpacks, luggage, and some DIY projects.
