Product Information

The DiIMAGE Xg digital camera offers the mobile user the chance to take high-quality pictures in any place and at anytime.

With the proud heritage of the DiIMAGE X Series built into a stylishly thin profile, the camera has user-friendly functions that enable you to capture images simply and easily for high-quality results. The DiIMAGE Xg's compact (just 20mm thick), unobtrusive body stems from its proprietary, non-extended 3x folded optical zoom,

which is a feature that will make this camera attractive among a wide range of users.

With the world's fastest start-up time of approx. 0.8 seconds, the DiIMAGE Xg can realize a rapid shot with a highly reliable shutter,

ensuring that you'll be ready to take great pictures right away with no waiting. The DiIMAGE Xg can shoot both still images and movies beautifully.

The Automatic Digital Subject Program Selection determines the conditions, and then selects suitable photo mode. The camera's range of movie functions enhances the fun of making movies
