Fence wire break detector -Kit

Autor:
Data de publicació: 11-01-2015

Use this PetSafe RFA-450 Wire Break Detector to easily locate wire breaks in the perimeter loop of your in-ground electric dog fence containment system. This kit includes everything you need to locate and repair complete breaks in your underground or above ground perimeter wire.

This repair system emits two different tones to help you find the wire break. This system works with all brands of containment systems including PetSafe, Perimeter, Invisible Fence, DogWatch, Innotek, PetStop, SportDOG and more.

Description

Finding a break in your pet fence boundary wire is easy with the new PetSafe® Wire Break Locator. This wire break detector helps accurately locate full wire breaks in any in-ground fence system. The wire break transmitter sends two unique tones down each side of your dog fence boundary wire. With the hand-held locator, you not only hear each tone sent by the wire break transmitter, but the red and green lights on the locator allow you to see which tone is being received. Wire breaks in the boundary wire are commonly found where the wire exits the house and enters the ground such as at wire splices, where the wires cross sidewalks or driveways, around landscaping and flower beds or in aerated lawns. When the wire break is located, use one of the included wire nuts and gel-filled capsules to repair the broken wire. We recommend repairing the breaks as you go around the boundary. Questions about the PetSafe® Wire Break Locator? Call PetSafe® Customer Care Monday through Saturday at 1-800-845-3274 and our friendly US-based Customer Care team will be glad to help.

A 25% restocking fee will be charged on all returned wire break locators.

Features

Easily Locate Breaks - Use the PetSafe® Wire Break Locator to find complete breaks in your In-Ground dog fence boundary wire; the Wire Break Locator is not designed to detect partial breaks
Advanced Technology - The Wire Break Locator uses dual tone and light indicators to locate wire breaks; the green light indicates a continuous tone and the red light indicates an intermittent tone
Included Items - The Wire Break Locator kit includes a locator transmitter and adaptor, expandable locator, 50 ft. of boundary wire, 2 grounding stakes, 4 gel-filled capsules, 4 wire nuts and a manual
Adjustable Volume - The locator features an adjustable volume dial to help listen for the dual transmitter tones and pinpoint the wire break; 2 AAA batteries are needed for the locator (not included)
Important Information - Both grounding stakes must be used in order to hear the two tones separately; if the ground is dry, then several gallons of water should be poured around the grounding stakes
Support for You - For any questions about the Wire Break Locator, call PetSafe® Customer Care Monday through Friday at 1-800-845-3274 or send us an email at ccc3@petsafe.net
Experience - PetSafe® brand has been an industry leading US manufacturer of pet behavior, containment and lifestyle products since 1991, helping millions of people and pets each year
