Description

100% Brand new and high quality.Product Shape: Same as the picture show

1. Frequency Measurement: 1MHz-2400MHz
2. Power Measurement: 0.1W-50W
3. Sampling Time: Approx.0.2s
4. Working Temperature: 0-40°C
5. Current Consumption: Approx.100mA
6. Power Supply: 3 * 1.5V AAA Batteries(not included)
7. Item Size: 9.5 * 5.5 * 2.5cm / 3.7 * 2.1 * 1in
8. Designed for measuring the frequency and power of radio equipment, such as walkie talkie and car-mounted radio device.
9. Built-in dummy load, convenient to use and the testing result is more reliable.
