SAMSUNG NAVIBOT SR8855 ROOMBA

Autor:
Data de publicació: 11-05-2018

SAMSUNG NAVIBOT SR8855 VACUUM CLEANER ROBOT.

In great working order and great cosmetic condition, although it has some light scratching around the control panel. You should be able to make out the scratching on the pictures.

Battery is strong and lasts for a complete cycle. No guarantees on battery life.

Simply press 'Start' on the robot, and watch it go out on a cleaning cycle. Or press Start and leave the house, come back to a fully cleaned floor.

Alternatively, you can use the remote control, or set up a schedule so that the robot starts automatically at the same time every day.

The Side brushes, sweep dirt into the path of the robot. The main brush then picks up the dirt and throws it into the path of the vacuum suction that then takes it into the dust bin at the rear of the robot, where it collects ready for you to empty it into the bin.

When you empty the bin, as it doesnt contain any electronics, it can be washed easily under a tap with warm water to give a fresh start when you replace the now emptied bin.

No problems climbing up on carpet from hard surfaces, I have a 1cm long pile rug on top of my laminate flooring, it climbs this with ease.

Suitable for Carpet or Hard surfaces.

Included in the sale are:

1. The Robot model number SR8855.

2. A Dock/Charger.

3. A Remote control and holder that clips to the dock.

4. 2 Virtual Guard/Fences.

5. A spare main brush and spare side brushes.
